

Join us May 31th 2014

# Geometry Level 1 Workshop

## with Rob Keys

Join us on Saturday, May 31st for an introduction to the concept of Montessori geometry and its relationship to the curriculum. Experiences in both 3-6 and 6-9 environments will be discussed and geometry materials will be fully demonstrated. The sessions will be fully hands-on with lots of opportunities to practice with the materials presented. A question and answer session will also be included.

Among the topics and materials explored will be the geometric solids, the geometry cabinet, constructive triangles, and presentations using the box of sticks. Concepts include types of lines, angles, shapes, parts of polygons, and much more.
